

**AMENDMENTS TO THE SPECIFICATION**

**Please amend the title of the specification as follows:**

FUEL CELL SEPARATOR THAT IS EXCELLENT IN WORKABILITY AND CORROSION  
RESISTANCE

**Please amend paragraph [0019] of the specification as follows:**

The invention provides a separator which is interposed between adjacent ones of a plurality of electrolyte assemblies, each constructed of an electrolyte layer containing an electrolyte medium sandwiched between two~~and~~a catalytic electrodes, the catalytic electrodes each being~~electrode~~ disposed on a surface in a thickness-wise direction of the electrolyte layer, comprising a separating section for achieving separation between a fuel gas channel and an oxidizer gas channel; and a sealing section disposed along an outer periphery of the separator, for preventing leakage of fuel gas and oxidizer gas, the separating section and the sealing section being integrally formed with each other[.],
